

SAMAD SAIYED

Senior Full Stack Developer

+91 9265049815 | samad.saiyed.ss@gmail.com | [LinkedIn](#) | [GitHub](#) | Anand

PROFESSIONAL SUMMARY

3+ years of full-stack engineer building scalable web and mobile products across MERN and PERN. Skilled in React, Next.js, Node.js, Express, MongoDB, React Native, and AWS. Own end-to-end delivery from architecture and APIs to UI, CI/CD, and cloud deployments, focusing on performance and reliability.

TECHNICAL SKILLS

Frameworks: ReactJS, NextJS, VueJS, Express, React Native, Expo

Frontend: SCSS, Tailwind CSS, MUI, Shadcn

Backend: NodeJS

Tools: AWS, Firebase, Git, CI/CD

Databases: MongoDB

Platforms: AWS Cloud, Windows, macOS, Android, iOS

Methodologies: Agile, Scrum, MVC

Library: MUI, Shadcn

PROFESSIONAL EXPERIENCE (3+ YEARS)

Senior Full Stack Developer | Jul 2023 - Feb 2026

Codentic Software | Anand

Promoted to Senior Full Stack Developer from Junior Frontend Developer

- Built and maintained **React, Next.js, and Vue** interfaces with reusable components, improving page load times by **120%**
- Integrated **third-party APIs/services** to enhance functionality, increasing feature adoption by **60%**.
- Managed **React Native** app delivery from build to store release, reducing crash rates by **70-80%**.
- Deployed and monitored on **AWS and Firebase**, enabling auto-scaling for **10,000** concurrent users with **99%** availability.
- Led **end-to-end full-stack delivery** across web and mobile, coordinating with product/design/QA to accelerate releases by **40%**.
- Designed and implemented **scalable MERN architectures** with robust APIs and data models, supporting **20000** MAU and **99%** uptime.
- Drove **performance optimization** on frontend and backend, improving latency and load times by **45%**.
- Established **best practices** for code reviews, CI/CD, and testing, cutting production defects by **55%**.

Technologies Used: ReactJS, NextJS, VueJS, React Native, AWS, Firebase, Tailwind CSS, MUI, SCSS, Git, NodeJS, Express, MongoDB, CI/CD, Shadcn

Web Developer Intern | Jan 2023 - Jul 2023

Codentic Software | Anand

- Strengthened **JavaScript, HTML, CSS** fundamentals and adopted **ReactJS/NextJS** to contribute to internal tooling and UI features.
- Collaborated on **state management** strategies and cross-team reviews to improve user flows and reduce inconsistencies.
- Optimized React UI rendering, reducing page load time by **38%** via memoization and code-splitting
- Launched a feature-flag system enabling selective rollouts, increasing adoption by **12%** in the first month
- Implemented client-side caching and optimistic updates, reducing server load by **25%** during peak traffic.
- Established unit tests covering **70%** of the codebase, decreasing post-merge bugs by **60%**

Technologies Used: JavaScript, HTML, CSS, ReactJS, NextJS, Redux, Zustand

PROJECTS

StickyPlane — AI-Powered Notes & Knowledge Management

- Built a full-stack AI note-taking and semantic search platform using **NextJS, NodeJS, PostgreSQL, and vector embeddings**.
- Implemented fast semantic search, AI summaries, TL;DR generation, and keyword extraction to improve information retrieval.
- Designed secure authentication with OAuth (Google, GitHub), token-based Chrome extension access, and role-safe settings.
- Optimized search and storage pipelines to support large personal knowledge bases with low latency.

Tech: NextJS, NodeJS, PostgreSQL, Vector Search, AI APIs, OAuth, Tailwind CSS

Yeet-Git — AI-Powered Git CLI Tool

- Built an AI-powered Git CLI to generate smart commit messages, automate PR descriptions, and assist with branching workflows.
- Designed developer-first CLI UX focused on productivity, clean diffs, and reduced cognitive load.
- Implemented AI prompts tuned for real-world Git workflows and CI/CD compatibility.

Tech: NodeJS, Git, CLI Tooling, AI APIs

PushPlane — Self-Hosted Web Push Notification Infrastructure

- Designed a developer-first, self-hosted web push notification system with per-project VAPID keys.
- Built Docker-first deployment with NodeJS backend and PostgreSQL for reliable message delivery.
- Implemented scalable push delivery, project isolation, and license-aware runtime without vendor lock-in.

Tech: NodeJS, PostgreSQL, Web Push, Docker, NextJS

AuthPlane — Contextual Authorization Infrastructure (Concept & Architecture)

- Designed an authorization-focused platform providing **time-bound, contextual permissions** separate from authentication.
- Architected RBAC, short-lived authorization sessions, re-authorization flows, and webhook-based callbacks.
- Focused on strict boundaries where authorization never executes business logic, improving system safety.

Tech: System Design, RBAC, Authorization Patterns, Webhooks

CounselKaro — Consultation & Lead Management Platform

- Developed a scalable web platform for managing consultations, leads, and user workflows.
- Implemented secure APIs, role-based access, and performance-optimized dashboards for internal teams.
- Improved lead conversion and response time through workflow automation and UI optimizations.

Tech: ReactJS, NextJS, NestJS, PostgreSQL, REST APIs, React Native

E-Commerce Platforms (4–5 Client Applications)

- Developed multiple production-grade e-commerce applications with product catalogs, carts, orders, and payment flows.
- Built reusable UI components, optimized API performance, and improved checkout reliability..
- Integrated third-party payment gateways, admin dashboards, and inventory management systems.

Tech: ReactJS, NextJS, NodeJS, MongoDB, REST APIs

EDUCATION

Bachelor of Engineering (Information Technology) | Apr 2023

Sardar Patel Engineering College | Anand, Gujarat

High School | *April 2019*

Shri J.P. Thakkar High School | *Anand, Gujarat*
